DETAILED ACTION

Claim Objections

Claims 20-21 and 23 are withdrawn because they depend from the canceled claim 19.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 7, 9, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Itoga et al (US 5,762,516).

Itoga discloses in Figures 5-6, a shielding device comprising:

a plurality of shielding plates (14, 16) integrally connected to a base rail (120 via

a plurality of webs (18, 20);

wherein the webs are narrower than the shielding plates.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2833

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7-18, 22, and 24-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petra et al (EP 0,766,352 A2) in view of Simmack (DE 3,625,240 C2).

Petra et al. disclose a shielding device comprising:

a plurality of shielding plates (24), each plate having a width wider than a width of a narrow web (32).

Petra et al. substantially disclose the claimed invention except for the plates are integrally extending from a base rail and are twisted at an angle of 90 degrees with respect to the rail.

Simmack suggests a plurality of plates (7) integrally extending from a base rail (6) and is form from a homogeneous material with the base rail.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the shielding plates integrally extending from a base rail into Petra et al.'s shielding device, as taught by Simmack for quick assembling process.

Response to Arguments

6. In response to applicant's argument on page 3, line 8 to line 18 of page 8.

Art Unit: 2833

Applicant's arguments with respect to claims 7-18, 22 and 24-25 have been considered but are moot in view of the new ground(s) of rejection.

7. In response to applicant's argument on page 8, line 19 to line 6 of page 9.

Applicant's arguments filed 7/27/02 have been fully considered but they are not persuasive. Because:

Itoga et al. clearly shows the web is narrower than the plate in Figures 5-6.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
